

WSQ - Administering Microsoft Azure SQL Solutions (DP-300)

About This Course

WSQ Administering Microsoft Azure SQL Solutions (DP-300) provides comprehensive training on maintaining, securing, and optimizing SQL databases on Azure. Participants will develop efficient data processes, design secure environments, and implement robust data integration procedures tailored to business requirements.

The course covers a wide range of topics, including deploying SQL Server in Azure, migrating SQL workloads, configuring database security, monitoring performance, and automating database tasks. Additionally, it emphasizes high availability and disaster recovery strategies, ensuring participants are well-equipped to handle various database scenarios in Azure environments.

What You'll Learn

By end of course, learners should be able to:

- Develop efficient processes and data warehouse process models for Azure SQ in accordance to business requirements.
- Design data validation and staging databases for Azure SQL.
- Design and verify an extraction process for Azure SQL that consolidates in accordance to business rules.
- Design a transformation and loading process for Azure SQL in accordance to business rules.
- Develop data integration procedure and translate business requirements into Azure SQL data structure.

Course Certificate

Two e-certificates will be awarded to trainees who have passed the assessment.

1. Statement of Achievement

Data Engineering ICT-DIT-4005-1.1 TSC under ICT Skills Framework issued by WSG/SSG.

2. Certification of Achievement issued by Tertiary Infotech Pte Ltd.

WSQ - Administering Microsoft Azure SQL Solutions (DP-300)

Course Outline:

Topic 1: Prepare to maintain SQL databases on Azure

Describe Microsoft Intelligent Data Platform roles
Understand SQL Server in an Azure virtual machine
Design Azure SQL Database for cloud-native applications
Explore Azure SQL Database Managed Instance

Topic 2: Deploy IaaS solutions with Azure SQL

Explain IaaS options to deploy SQL Server in Azure
Understand hybrid scenarios
Explore performance and security
Explain high availability and disaster recovery options
Exercise: Provision a SQL Server on an Azure Virtual Machine

Topic 3: Deploy PaaS solutions with Azure SQL

Explain PaaS options for deploying SQL Server in Azure
Explore single SQL database
Deploy SQL database elastic pool
Understand SQL database hyperscale
Examine SQL managed instance
Describe SQL Edge
Exercise: Deploy an Azure SQL Database

Topic 4: Evaluate strategies for migrating to Azure SQL

Understand compatibility level
Understand Azure preview features
Describe Azure database migration options

Topic 5: Migrate SQL Server workloads to Azure SQL Database

Choose the right Azure SQL Database feature
Use Azure SQL migration extension to migrate to Azure SQL Database
Explore Data Migration Assistant to migrate to Azure SQL Database
Migrate to Azure SQL Database using BACPAC
Use an online method to migrate to Azure SQL Database
Move data to Azure SQL Database
Exercise: Migrate a SQL Server database to Azure SQL Database

Topic 6: Migrate SQL workloads to Azure Managed Instances

Evaluate migration scenarios to SQL Database Managed Instance
Migrate to SQL Database Managed Instance
Load and Move data to SQL Database Managed Instance

Topic 7: Configure database authentication and authorization

Describe Active Directory and Microsoft Entra ID
Describe authentication and identities
Describe Security Principals
Describe database and object permissions

Identify authentication and authorization failures

Exercise: Authorize Access to Azure SQL Database with Microsoft Entra ID

Topic 8: Protect data in-transit and at rest

Explore Transparent Data Encryption

Configure server and database firewall rules

Explain object encryption and secure enclaves

Enable encrypted connections

Describe SQL injection

Understand Azure Key Vault

Exercise: Configure a server-based firewall rule using the Azure portal

Topic 9: Implement compliance controls for sensitive data

Explore data classification

Explore server and database audit

Implement Dynamic Data Masking

Implement Row Level security

Understand Microsoft Defender for SQL

Explore Azure SQL Database Ledger

Implement Azure Purview

Exercise: Enable Microsoft Defender for SQL and Data Classification

Topic 10: Describe performance monitoring

Describe performance monitoring tools

Describe critical performance metrics

Establish baseline metrics

Explore extended events

Describe Azure SQL Insights

Explore Query Performance Insight

Exercise: Isolate problems with monitoring

Course Information

Course Code: TGS-2024048319

Skills Framework: Data Engineering ICT-DIT-4005-1.1 TSC under ICT Skills Framework

Course Fee (Before Funding):

\$2,000.00 (Bef. GST)

\$2180.00 (Incl. GST)

Time: 9:30am-6:30pm

Duration: 32hrs (4 days)

Tel: +65 6100 0613

Email: support@tertiaryinfotech.com

WhatsApp: <https://wa.me/6561000613>

Registration Link:

<https://www.tertiarycourses.com.sg/wsq-administering-microsoft-azure-sql-solutions-dp-300.html>

Enquiry

Venue: 12 Woodlands Square, #07-85/86/87,
Woods Square Tower 1, Singapore 733715 (Disabled-Friendly)

Minimum Entry Requirements

Knowledge and Skills

- Able to operate using computer functions with minimum Computer Literacy Level 2 based on ICAS Computer Skills Assessment Framework.
- Minimum 3 GCE 'O' Levels Passes including English or WPL Level 5 (Average of Reading, Listening, Speaking & Writing Scores).

WSQ Funding

WSQ funding is only applicable to Singaporeans/PRs. Subject to eligibility, the funding support is subjected to funding caps.

Baseline: Singaporean/PR age 21 and above

MCES: Singaporeans aged 40 years old and above

SME: Small and Medium Enterprises.

SkillsFuture Enterprise Credit (SFEC):

Eligible Singapore-registered companies can claim up to \$10,000.

Effective for Courses starting from 1 Jan 2024

Full Fee	GST	Nett Fee after Funding (Inc. GST)	
		Baseline	MCES / SME
\$2,000	\$180.00	\$1,180.00	\$780.00

UTAP Funding

Eligible NTUC members can apply for 50% of the unfunded fee from UTAP, capped at \$250 per year. NTUC members aged 40 and above will get increased funding support from \$250 to \$500.

Absentee Payroll (AP) Funding

\$4.50 per hour, capped at \$100,000 per enterprise per calendar year.

AP funding will be computed based on the actual number of training hours attended by the trainee.

Frequently Asked Questions

* **What are the prerequisites for WSQ Funding?**

1. You need to be a Singaporean Citizen or Permanent Resident, physically based in Singapore.
2. You must successfully complete the programme and pass the assessment in order to be eligible.
3. You must attend at least 75% of the training.

* **Can I club any other grant with this subsidy?**

No, you cannot claim any other grant if you are claiming this subsidy from SSG. You should not be claiming for any other grants, subsidies, or tax concessions, provided unless explicitly permitted.

* **Do I need to pay the full fee, and then claim the subsidy from WSQ Funding?**

The programme works on a Nett fee model, i.e. you only need to pay the difference between the fee, and the funding amount at the time of enrollment. The training provider (TP) will claim the funding amount from SSG on completion of the programme. In case you fail to complete the programme, or if the claim raised by TP is rejected by SSG then you are liable to pay the funding amount to TP.
